

# MG42 FOUND A FEW MORE IN THE WAREHOUSE! A MAGIC GUN FROM WWII

The M53 is an exact clone of the MG42 that was post war made. All parts are interchangeable with the MG42 & the caliber is the same 8x57mm Mauser (other MG42 clones were made in 7.62 NATO). We may never see any more MG42 or M53 full kits due to recent import restrictions. **\$595.00 MG42018**

This kit includes all parts to the gun except receiver. The 2 bolt guide rails and the reciprocator have been removed from the receiver and are part of the kit. Barrel jacket has thread damage at front end as the part of ATF specs.

Semi-auto receivers are available from several sources.
