# **SPANISH CETME MODEL** (C) RIFLE PARTS SET BEST ollaboration between German engineers and Franco's Spanish esigners drove Spain to adopt the (C) version of the CETME rifle in 1974. Regarded as the lightweight option, the C rifle was adopted by the Spanish Army, Navy, and Air Force and chambered for the .308 Nato round. The German G-3 and the CETME are close cousins and share many of the same parts. In fact, <u>25 parts</u> from the CETME and G-3 / HK91, are <u>interchange</u>.

in lact, 25 parts from the CELME and G-3 / FRS1, are interchanges
able with one another, Another 3 parts from the Trigger pack are also
interchangeable as long as they are used as a set. The quality of the parts in this kit are remarkably excellent and
outer parts are present with most of their original Parkerizing!
Our parts set includes all parts shown in the pictured parts breakdown above including the trunion and other necessary receiver parts for your semi auto build. We have barrels & 20rd magazines available separately. Additionally we

will have receivers available very soon. The kit's real visual strength is the wooden stock and forend which accentuate the rifle's appearance and makes it look sporty and more appealing than the plastic furniture of the G-3. These kits are outstanding and we have not had this kind of quality in bulk kits since we had our Argentine FAL kits!

### Model L4A3 **BREN .308 L4A3** .308 PARTS SET **GETTING LOW !!!** NOW IS THE TIME TO BUY THIS !!!! No sales to WA. After over 50 years of searching for these on the international market, we've finally obtained the classic 308 Bren as used from the 1950s through the 1990s! Last major use was in the Falklands War, but they are still blasting away in the Congo, Sudan, and other hot spots. Predecessor to the MAG-58, the Bren .308 LMGs evolved in many versions, whether converted from existing Bren models or made completely new, these guns

were a formidable improvement on the .303 models. Stalwart enough for use in the Falkland operation where British 2 Para, employed them along side the MAG-58. The magazines were ideally made to interchange with the the L1A1 service rifle of the time. Sarco has obtained the Model L4A3 Bren Light Machine Gun and had the receivers cut to BATF specification
