SPANISH CETME MODEL (C) RIFLE PARTS SET

Collaboration
between German
engineers and Franco's Spanish designers drove
Spain to adopt the (C) version of the CETME rifle in
1974. Regarded as the lightweight option, the C rifle
was adopted by the Spanish Army, Navy, and Air
Force and chambered for the .308 Nato round. The Ger-
man G-3 and the CETME are close cousins and share
many of the same parts. In fact, 25 parts
from the CETME and G-3 / HK91,
are interchangeable with one
another. Another 3 parts
from the Trigger pack are also interchangeable
as long as they are used as a set. The quality of the parts in
this kit are remarkably excellent and outer parts are present with most of
their original Parkerizing! Our parts set includes all parts shown in the pictured parts breakdown above includ-
ing the trunion and other necessary receiver parts for your semi auto build. We have barrels & 20rd magazines
available separately. Additionally we will have receivers available very soon. The kit's real visual strength is the
wooden stock and forend which accentuate the rifle's appearance and makes it look sporty and more appealing
than the plastic furniture of the G-3. These kits are outstanding and we have not had this kind of quality in bulk
kits since we had our Argentine FAL kits!

NOTE ON NON-FIRING DISPLAY GUNS

While most Americans can own non-firing display guns, some States and municipalities have enacted regu-
lations inhibiting ownership. It is important that you check your State's gun laws to see if you reside in one
of these areas. We cannot ship our display guns out of the country. Below is a partial list of States where
there are laws concerning ownership of display guns. Remember, by ordering from Sarco, Inc., you are
confirming to us that you are complying with your State regulations on this issue. CA, CT, KS, MA, MN, WI
*All non-firing display guns come with an orange plug inserted in the muzzle - required by Commerce law.
